WATERFALL

New watercooler model connected to the water mains powered by Water Time with high delivery capacity and an advanced technology.

Elegant and versatile

WATERFALL is suitable for every taste,
ideal for large offices, showrooms and break areas.

Eco friendly

Delivers water directly from the water mains ensuring maximum hygiene thanks to inlet filtration and a double in-line sanitization system.

It distributes cups and water bottles in 100% recyclable certified materials.

- External structure material: painted steel and tempered glass
- Internal material in contact with water: stainless steel
- Full hd vertical 15,6" touch display
- Keys for dispensing partial volumes: pause-resume-stop
- Multilingual menu with easy access for people with disability
- Technical menu with double access for remote on-site control and management

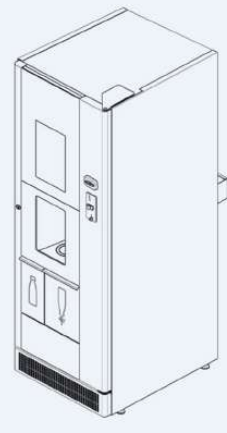

Able to deliver
4 different types of water:

- Natural at room temperature
- Natural at cold temperature (adjustable)
- Sparkling at cold temperature (adjustable)
- Slightly sparkling at cold temperature

The cold carbonation allows to obtain sparkling water with a strong taste
7.5 kg refillable CO₂ cylinder
4 kg spare cylinder that comes into operation when the first is running out, without interrupting the carbonation function

WATERFALL
